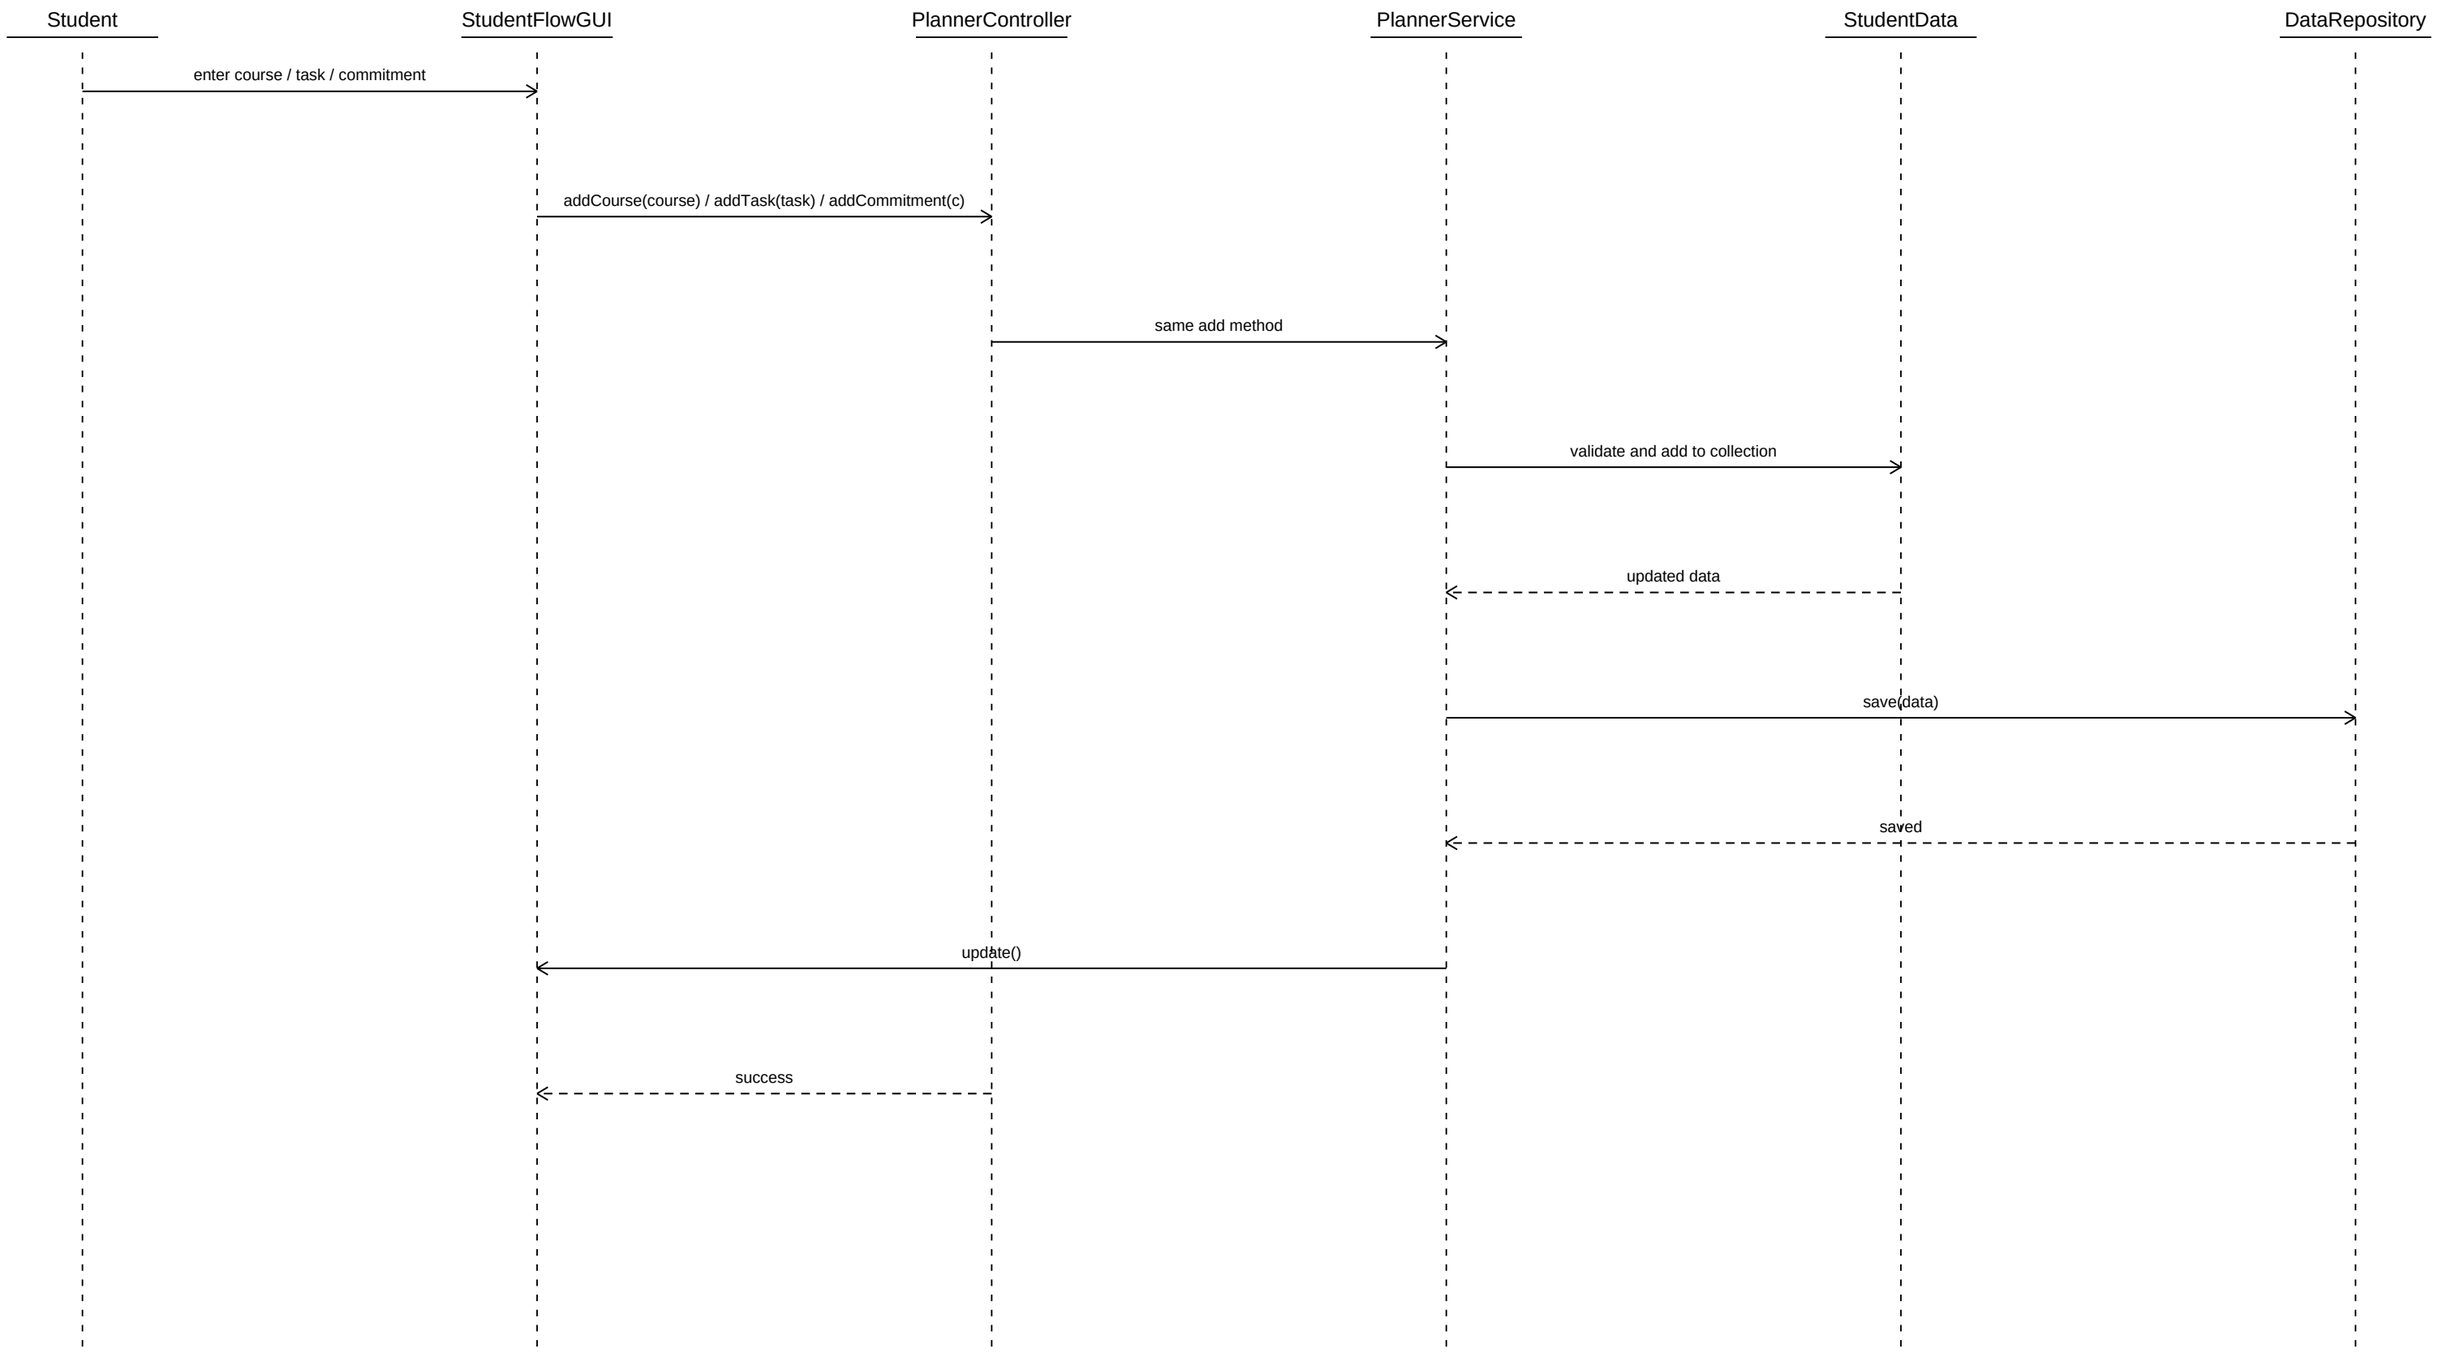
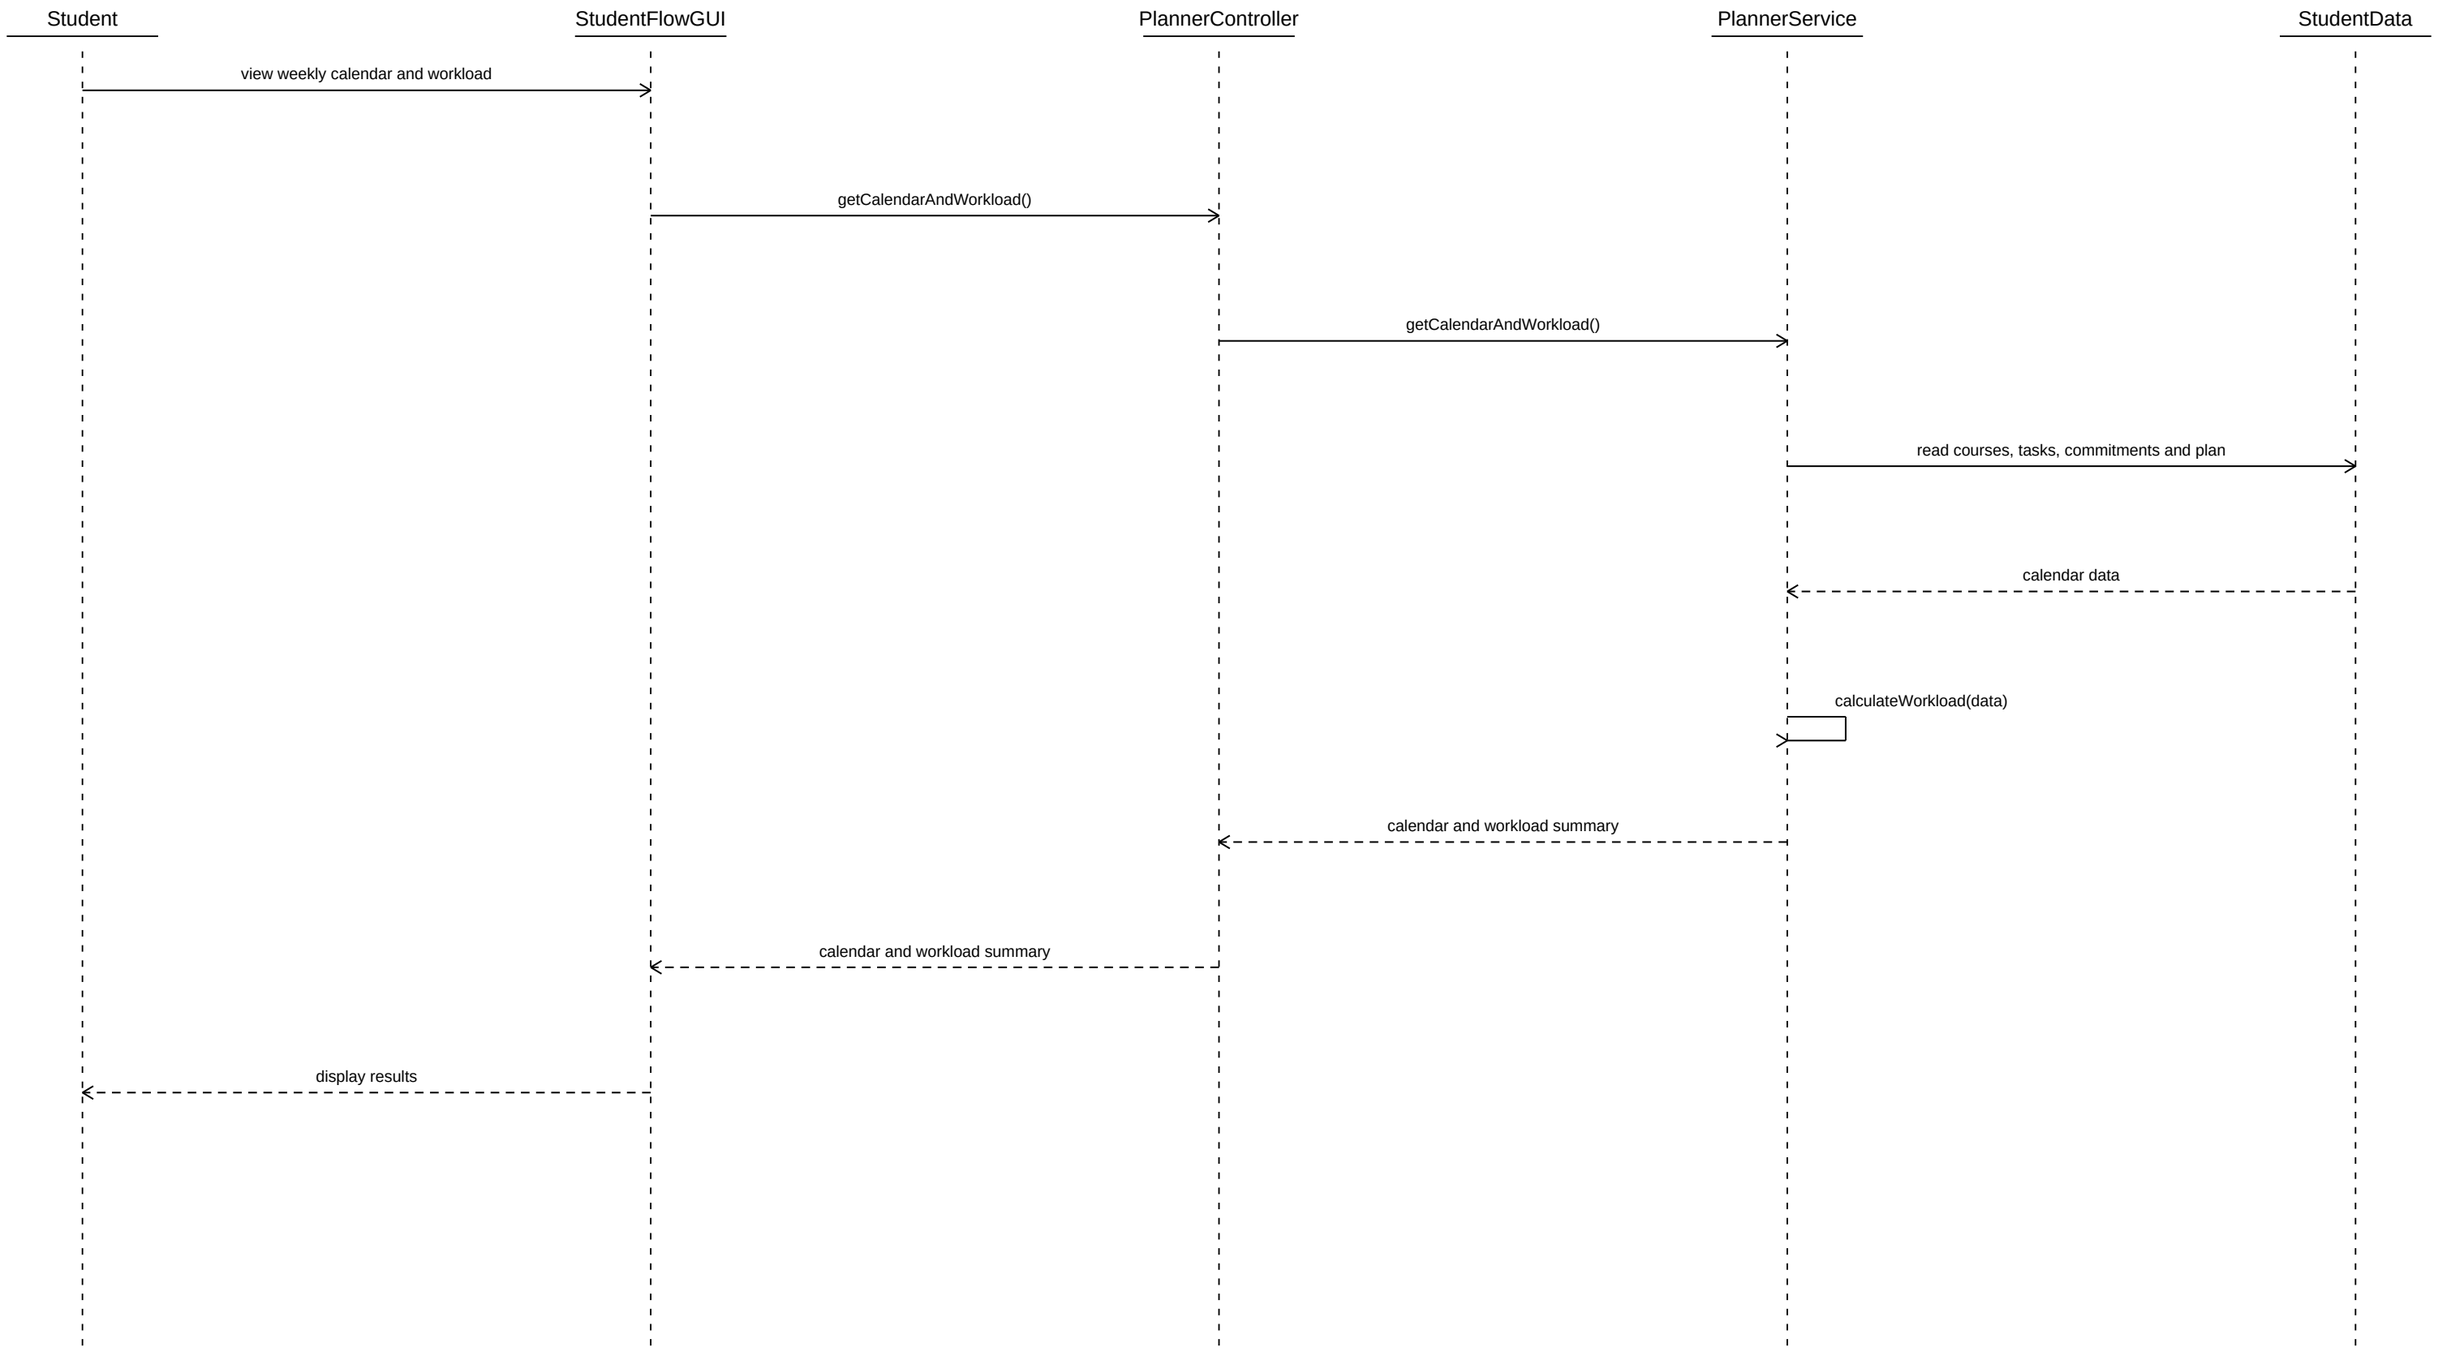
1. Manage courses, tasks and commitments (UC01-UC03)



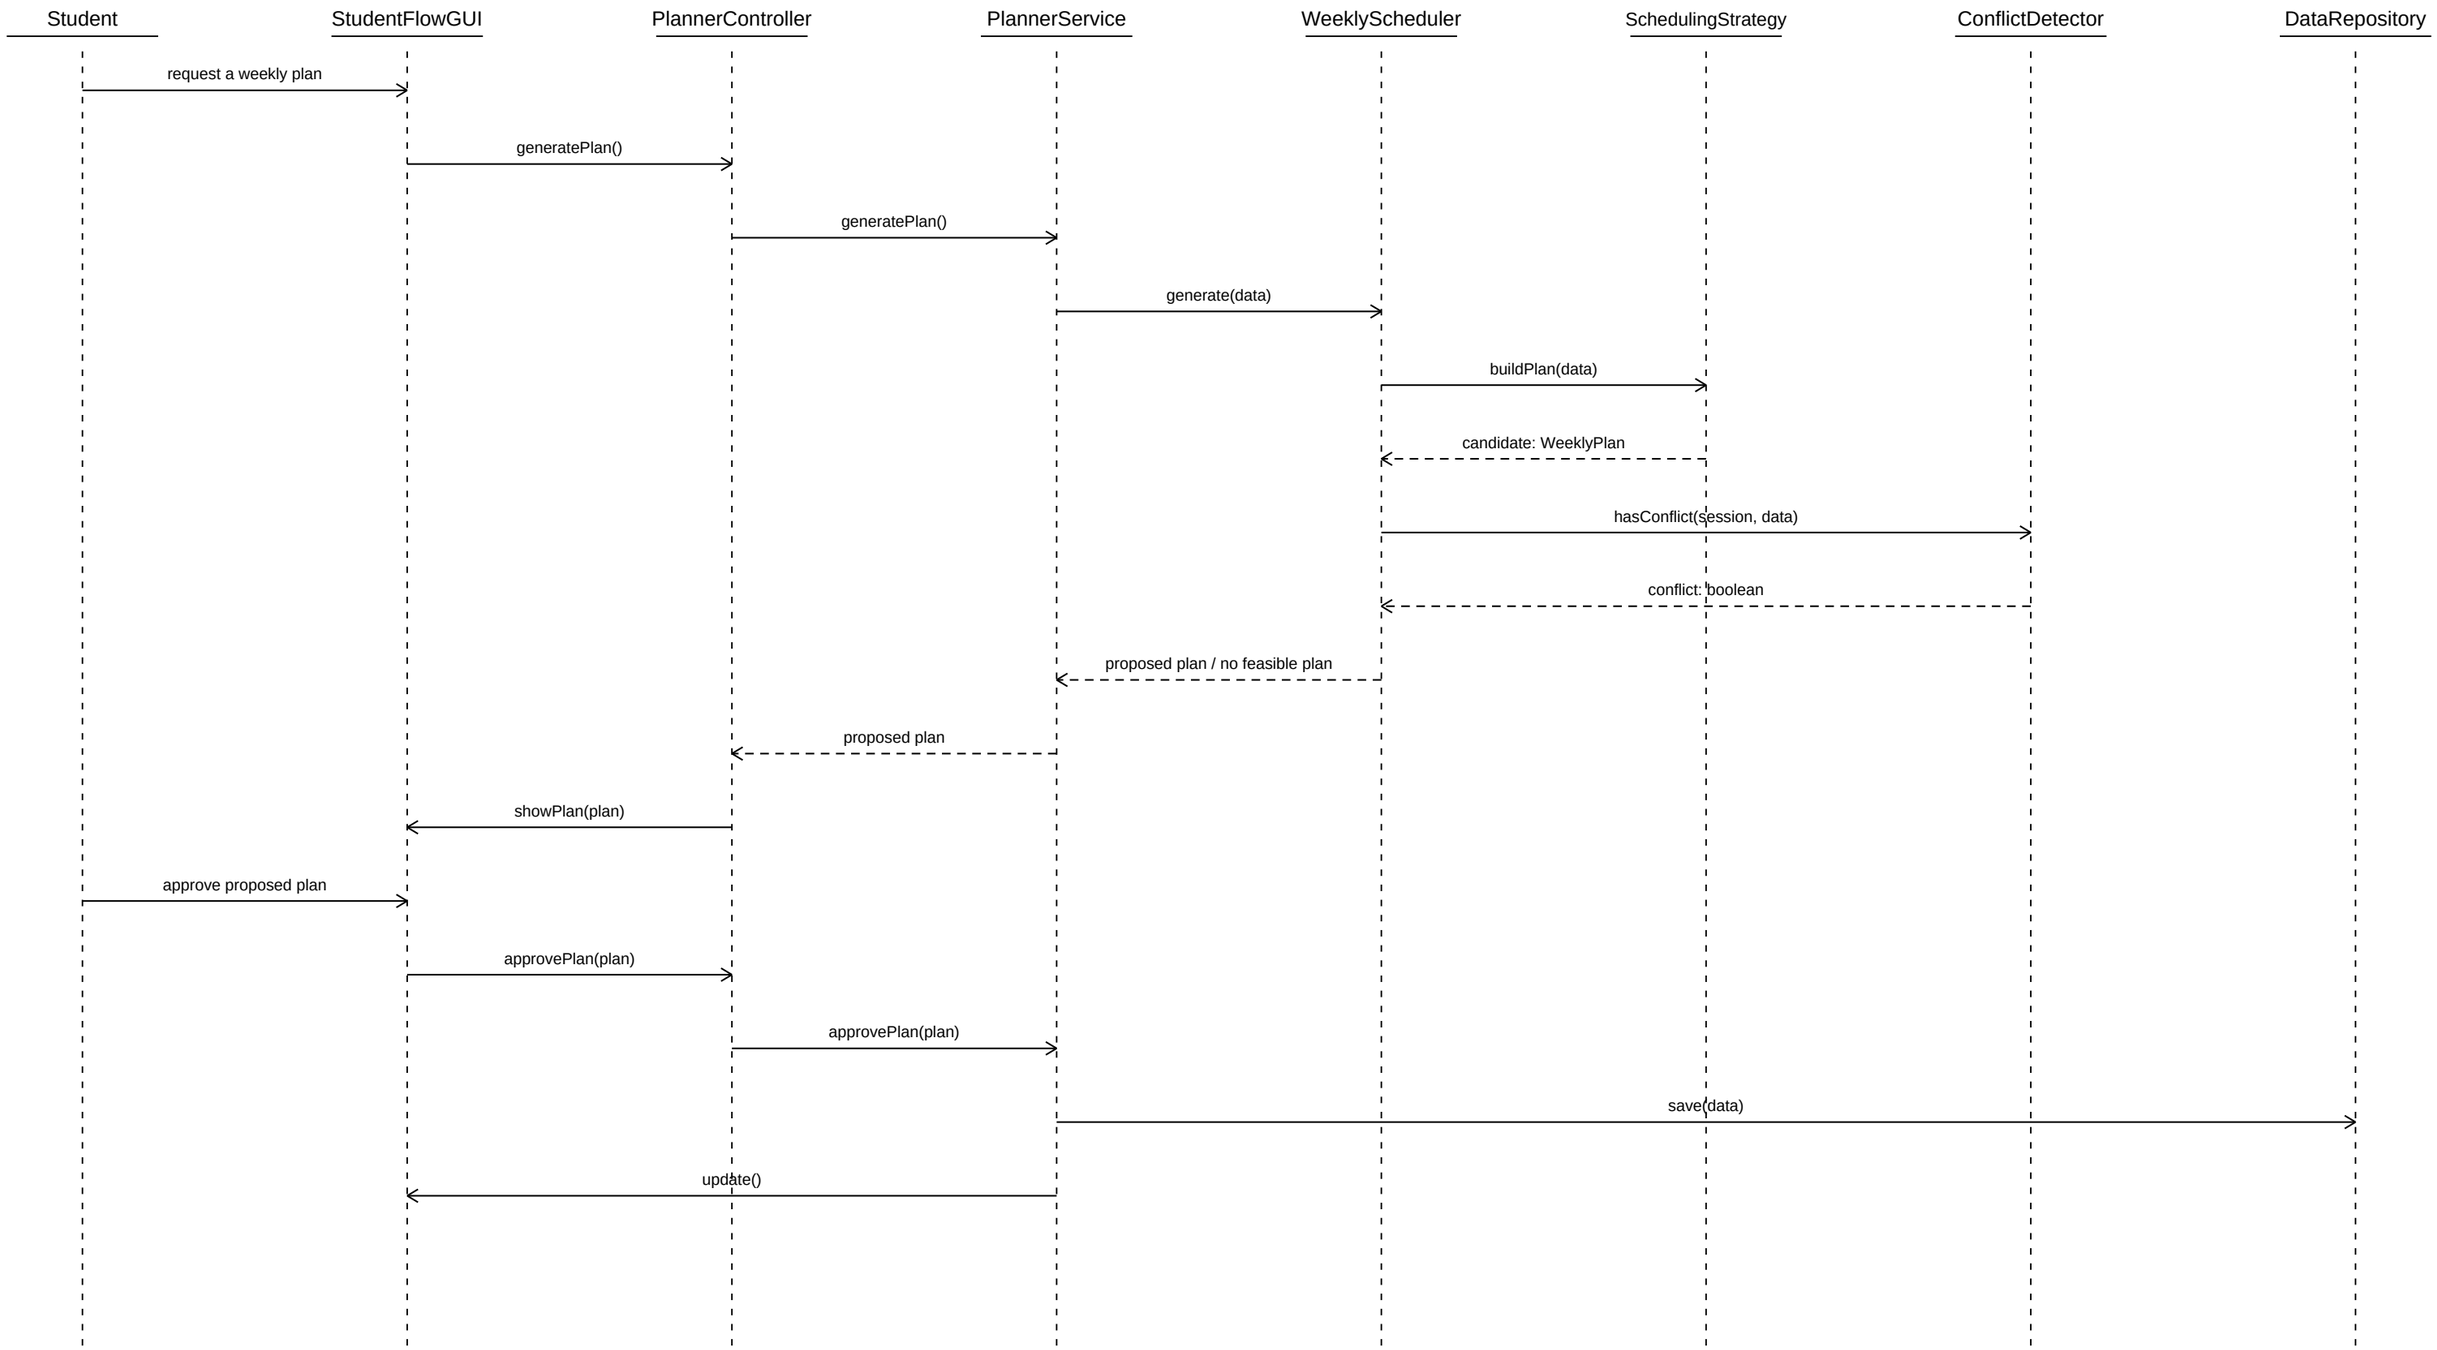
Note: Valid input: save and notify GUI. Invalid input: return error without saving.

2. View calendar and analyze workload (UC04-UC05)



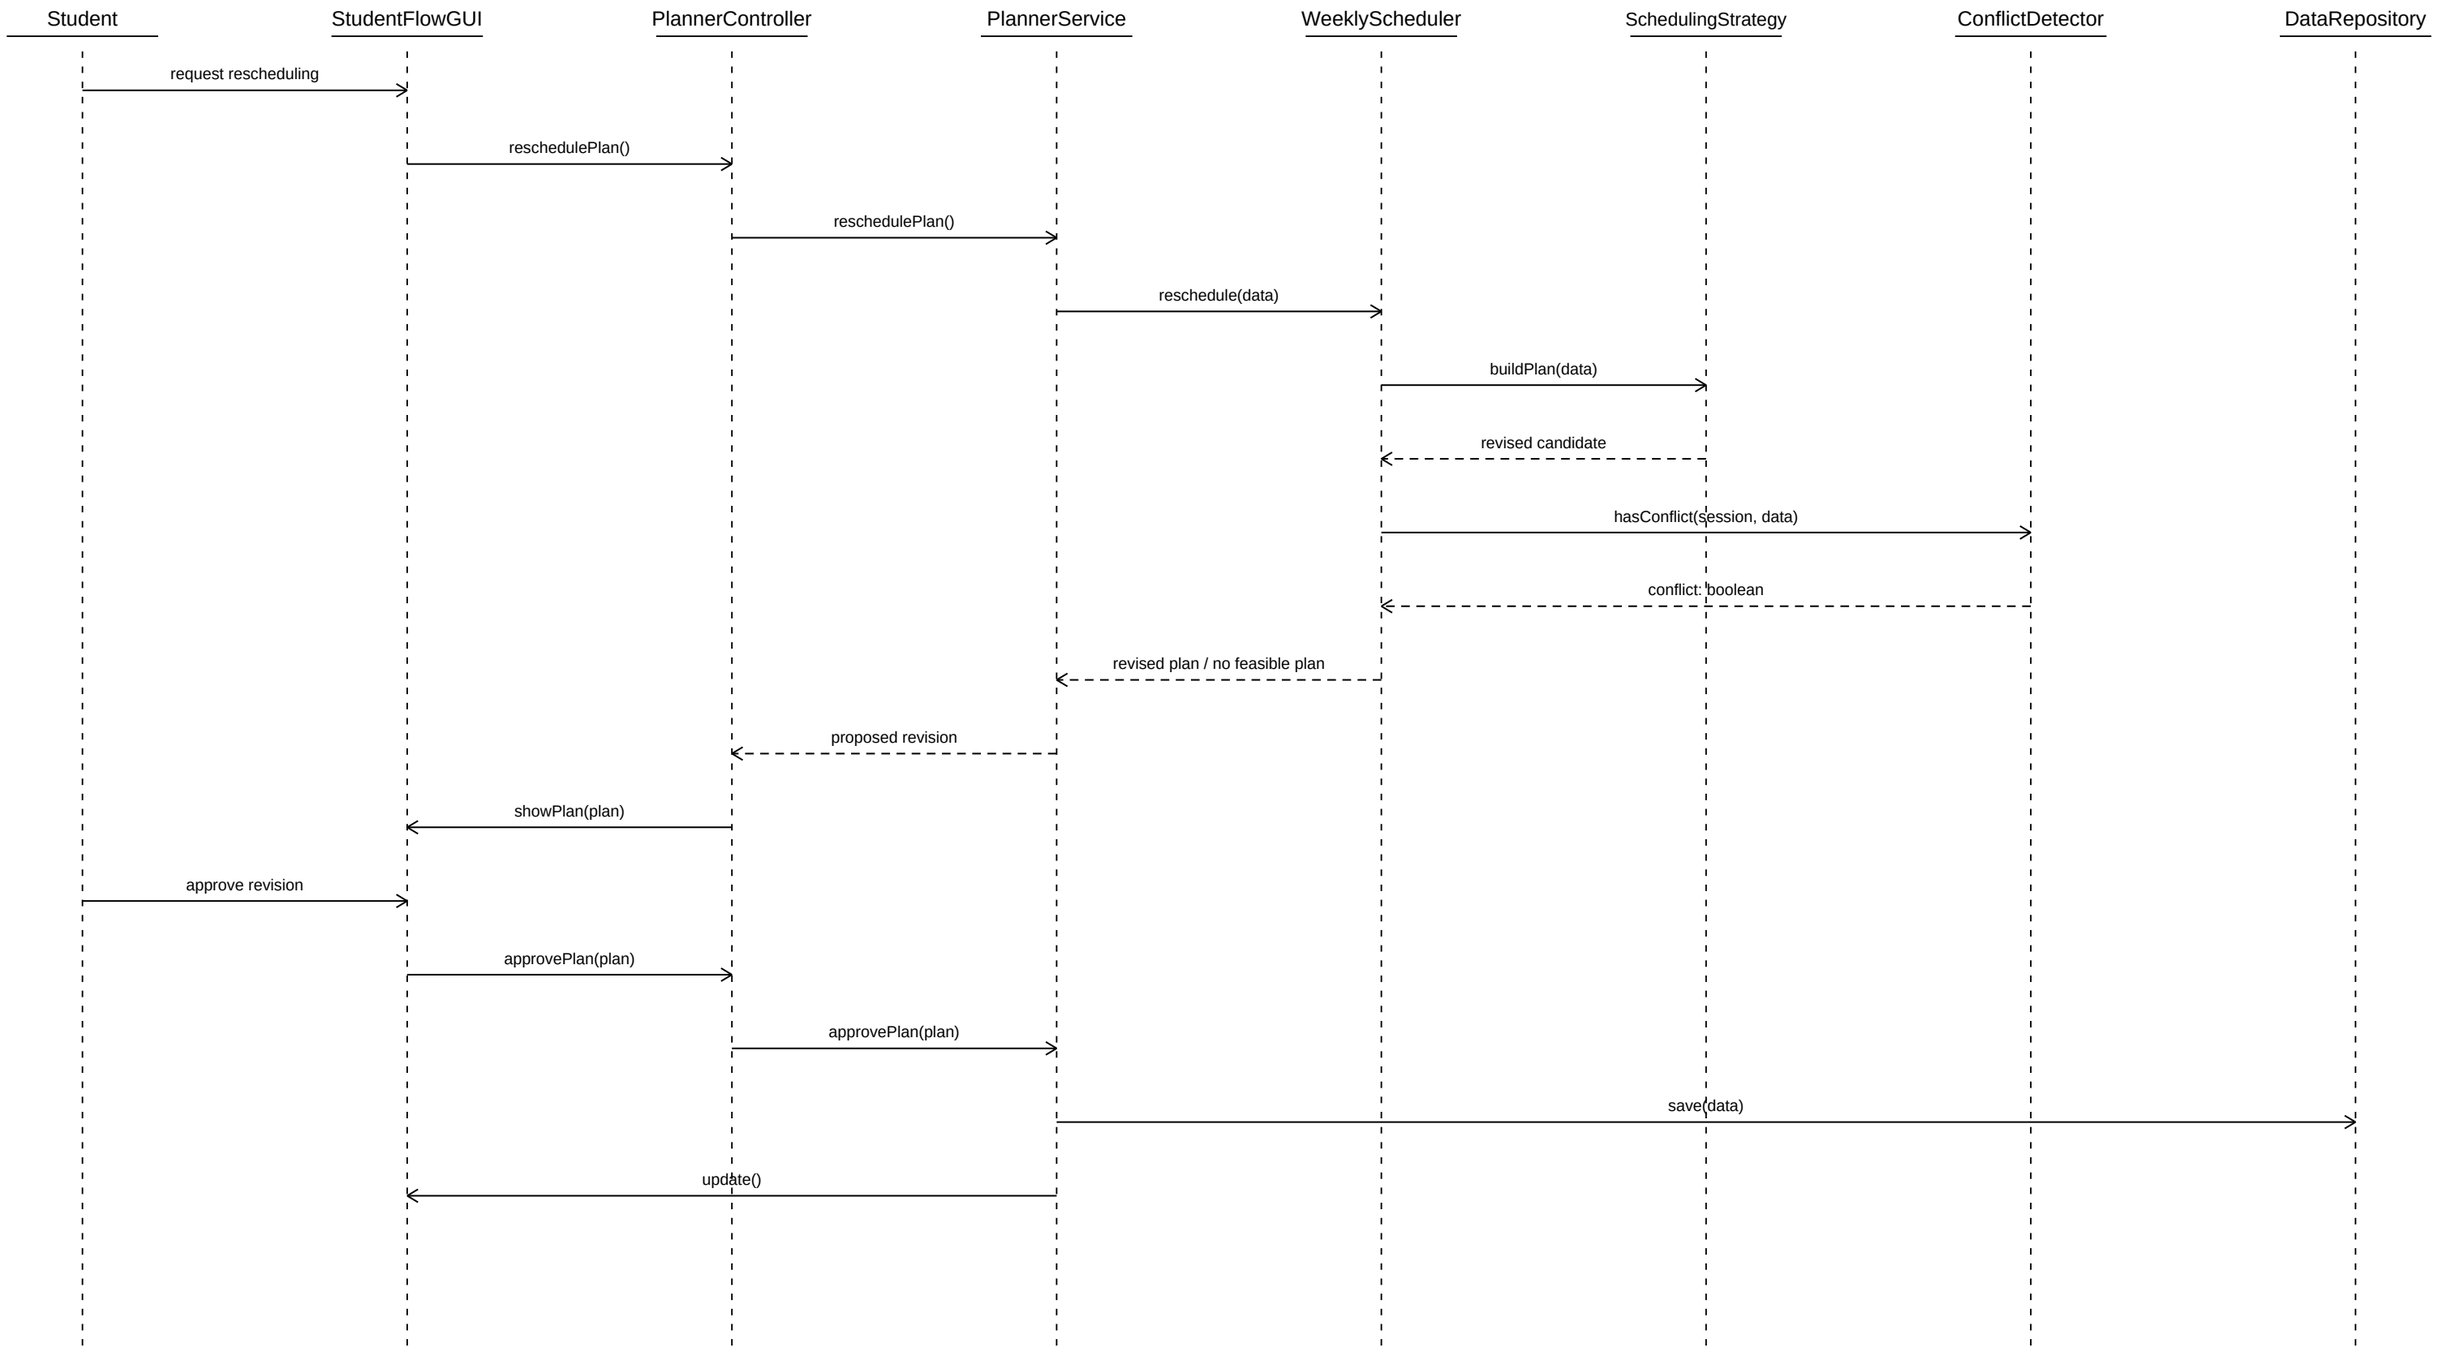
Note: If there are no tasks, display the calendar with a workload of zero.

3. Generate and approve a weekly plan (UC06-UC07)



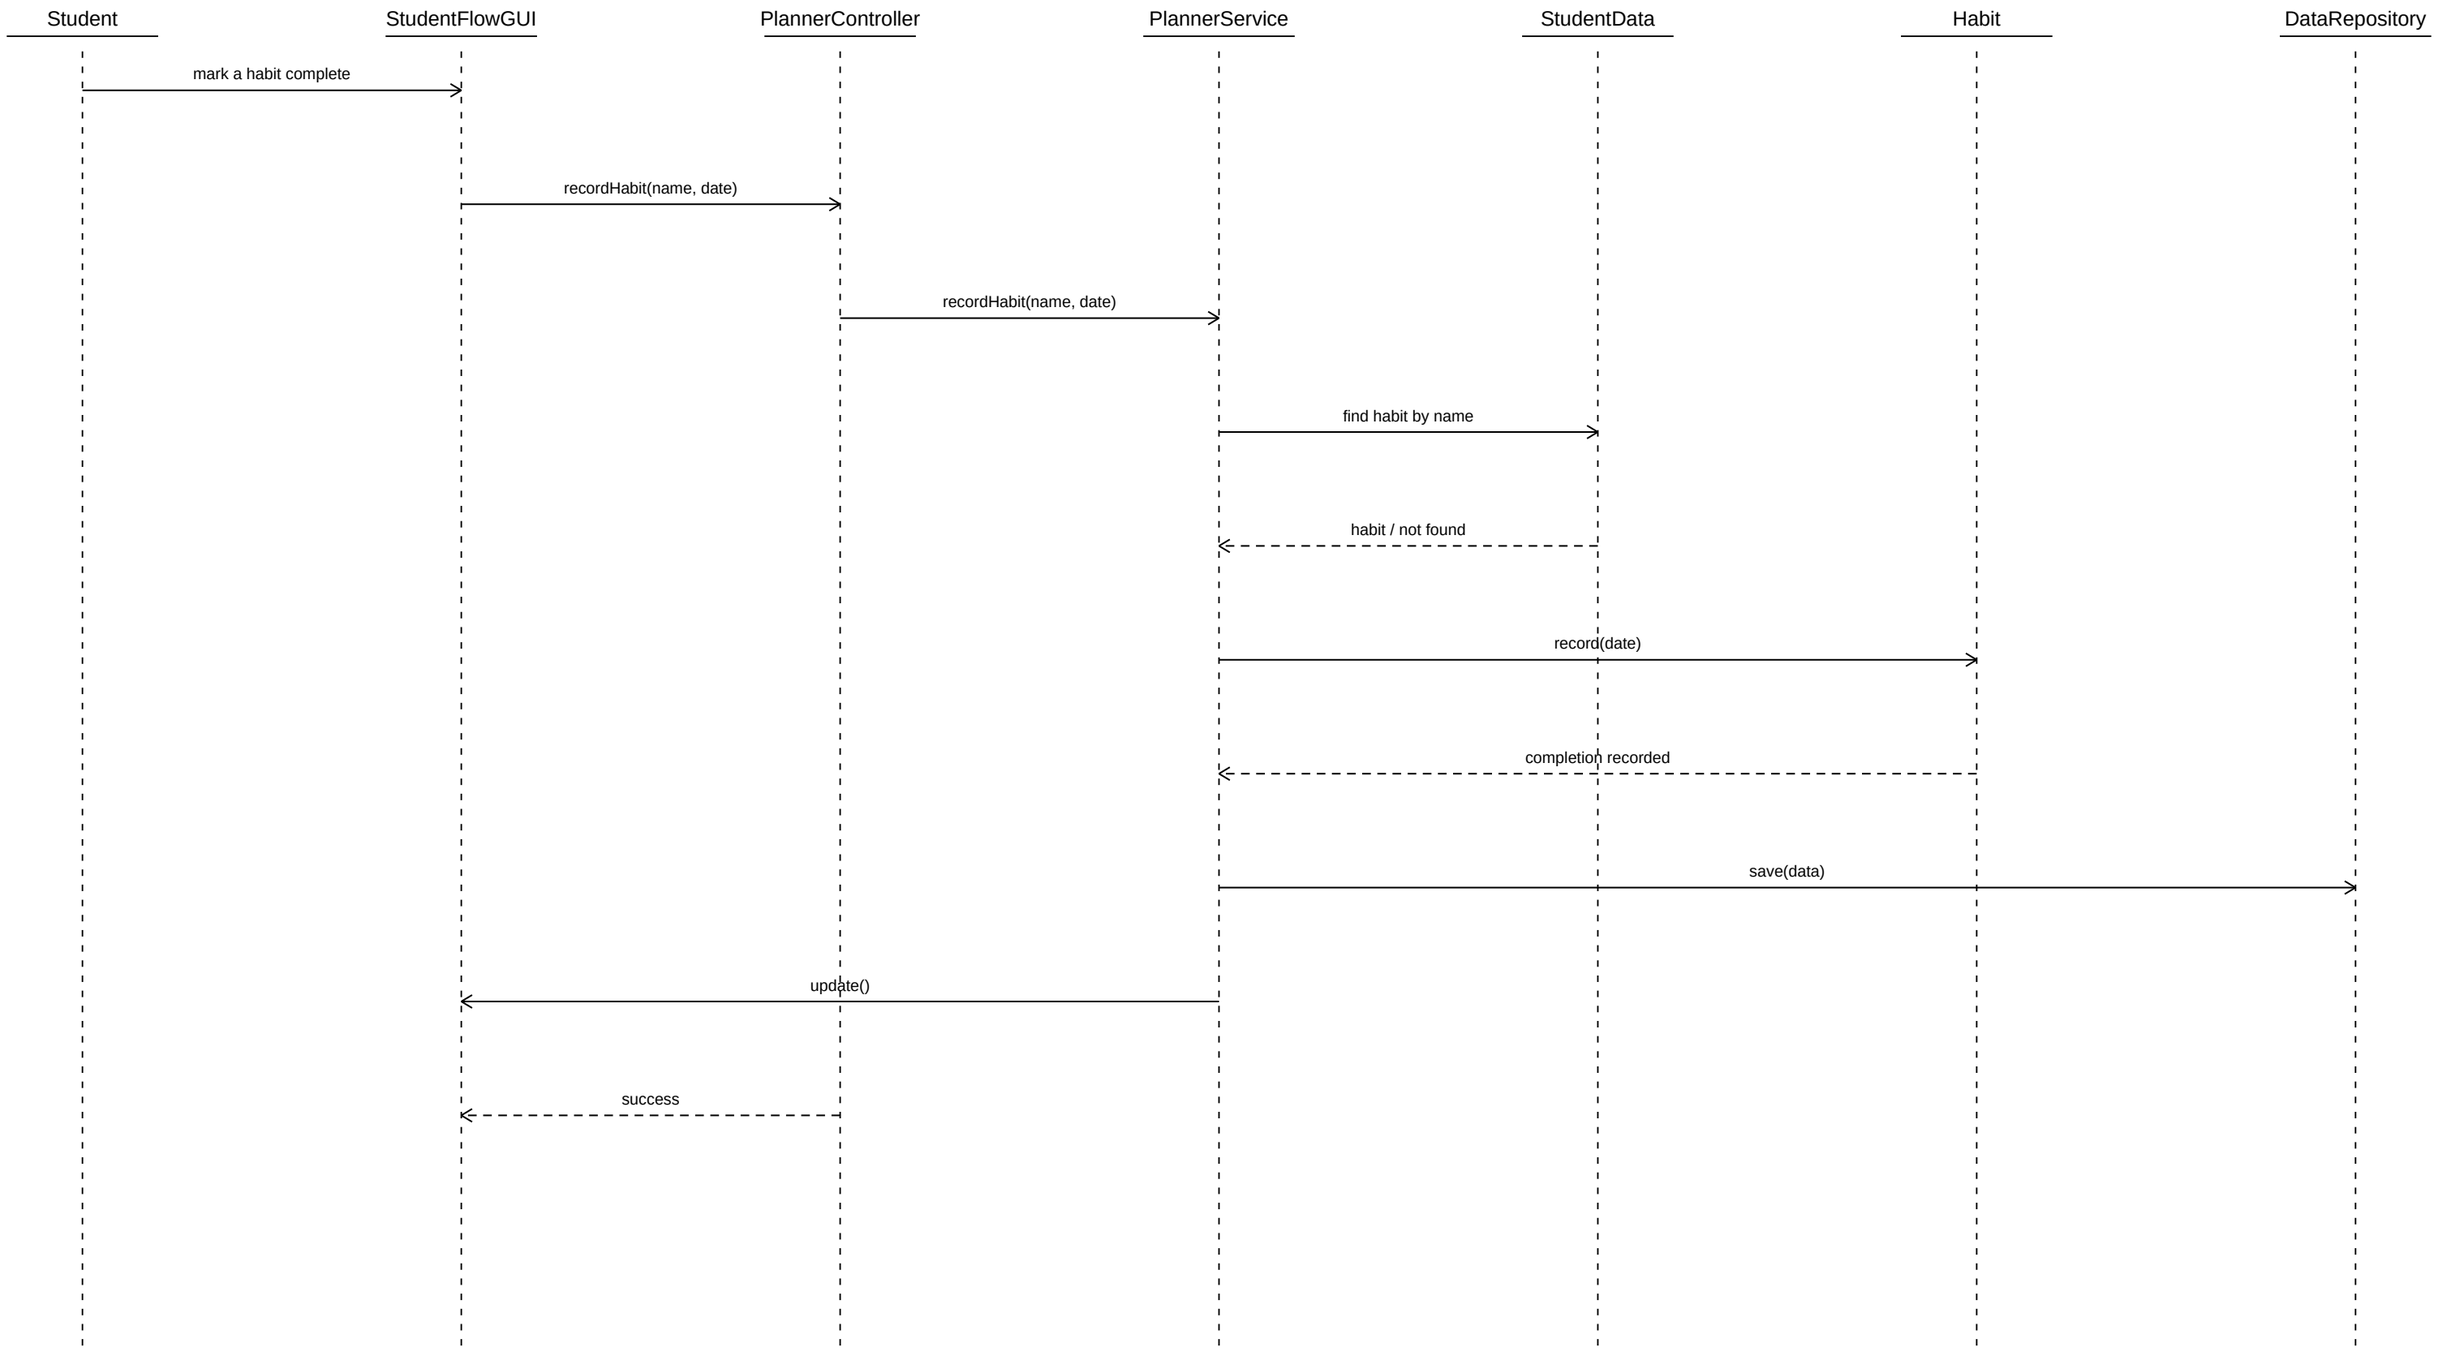
Note: If the scheduler cannot find a valid plan, show an error. If the student rejects it, do not save.

4. Reschedule an existing plan (UC08, UC07)



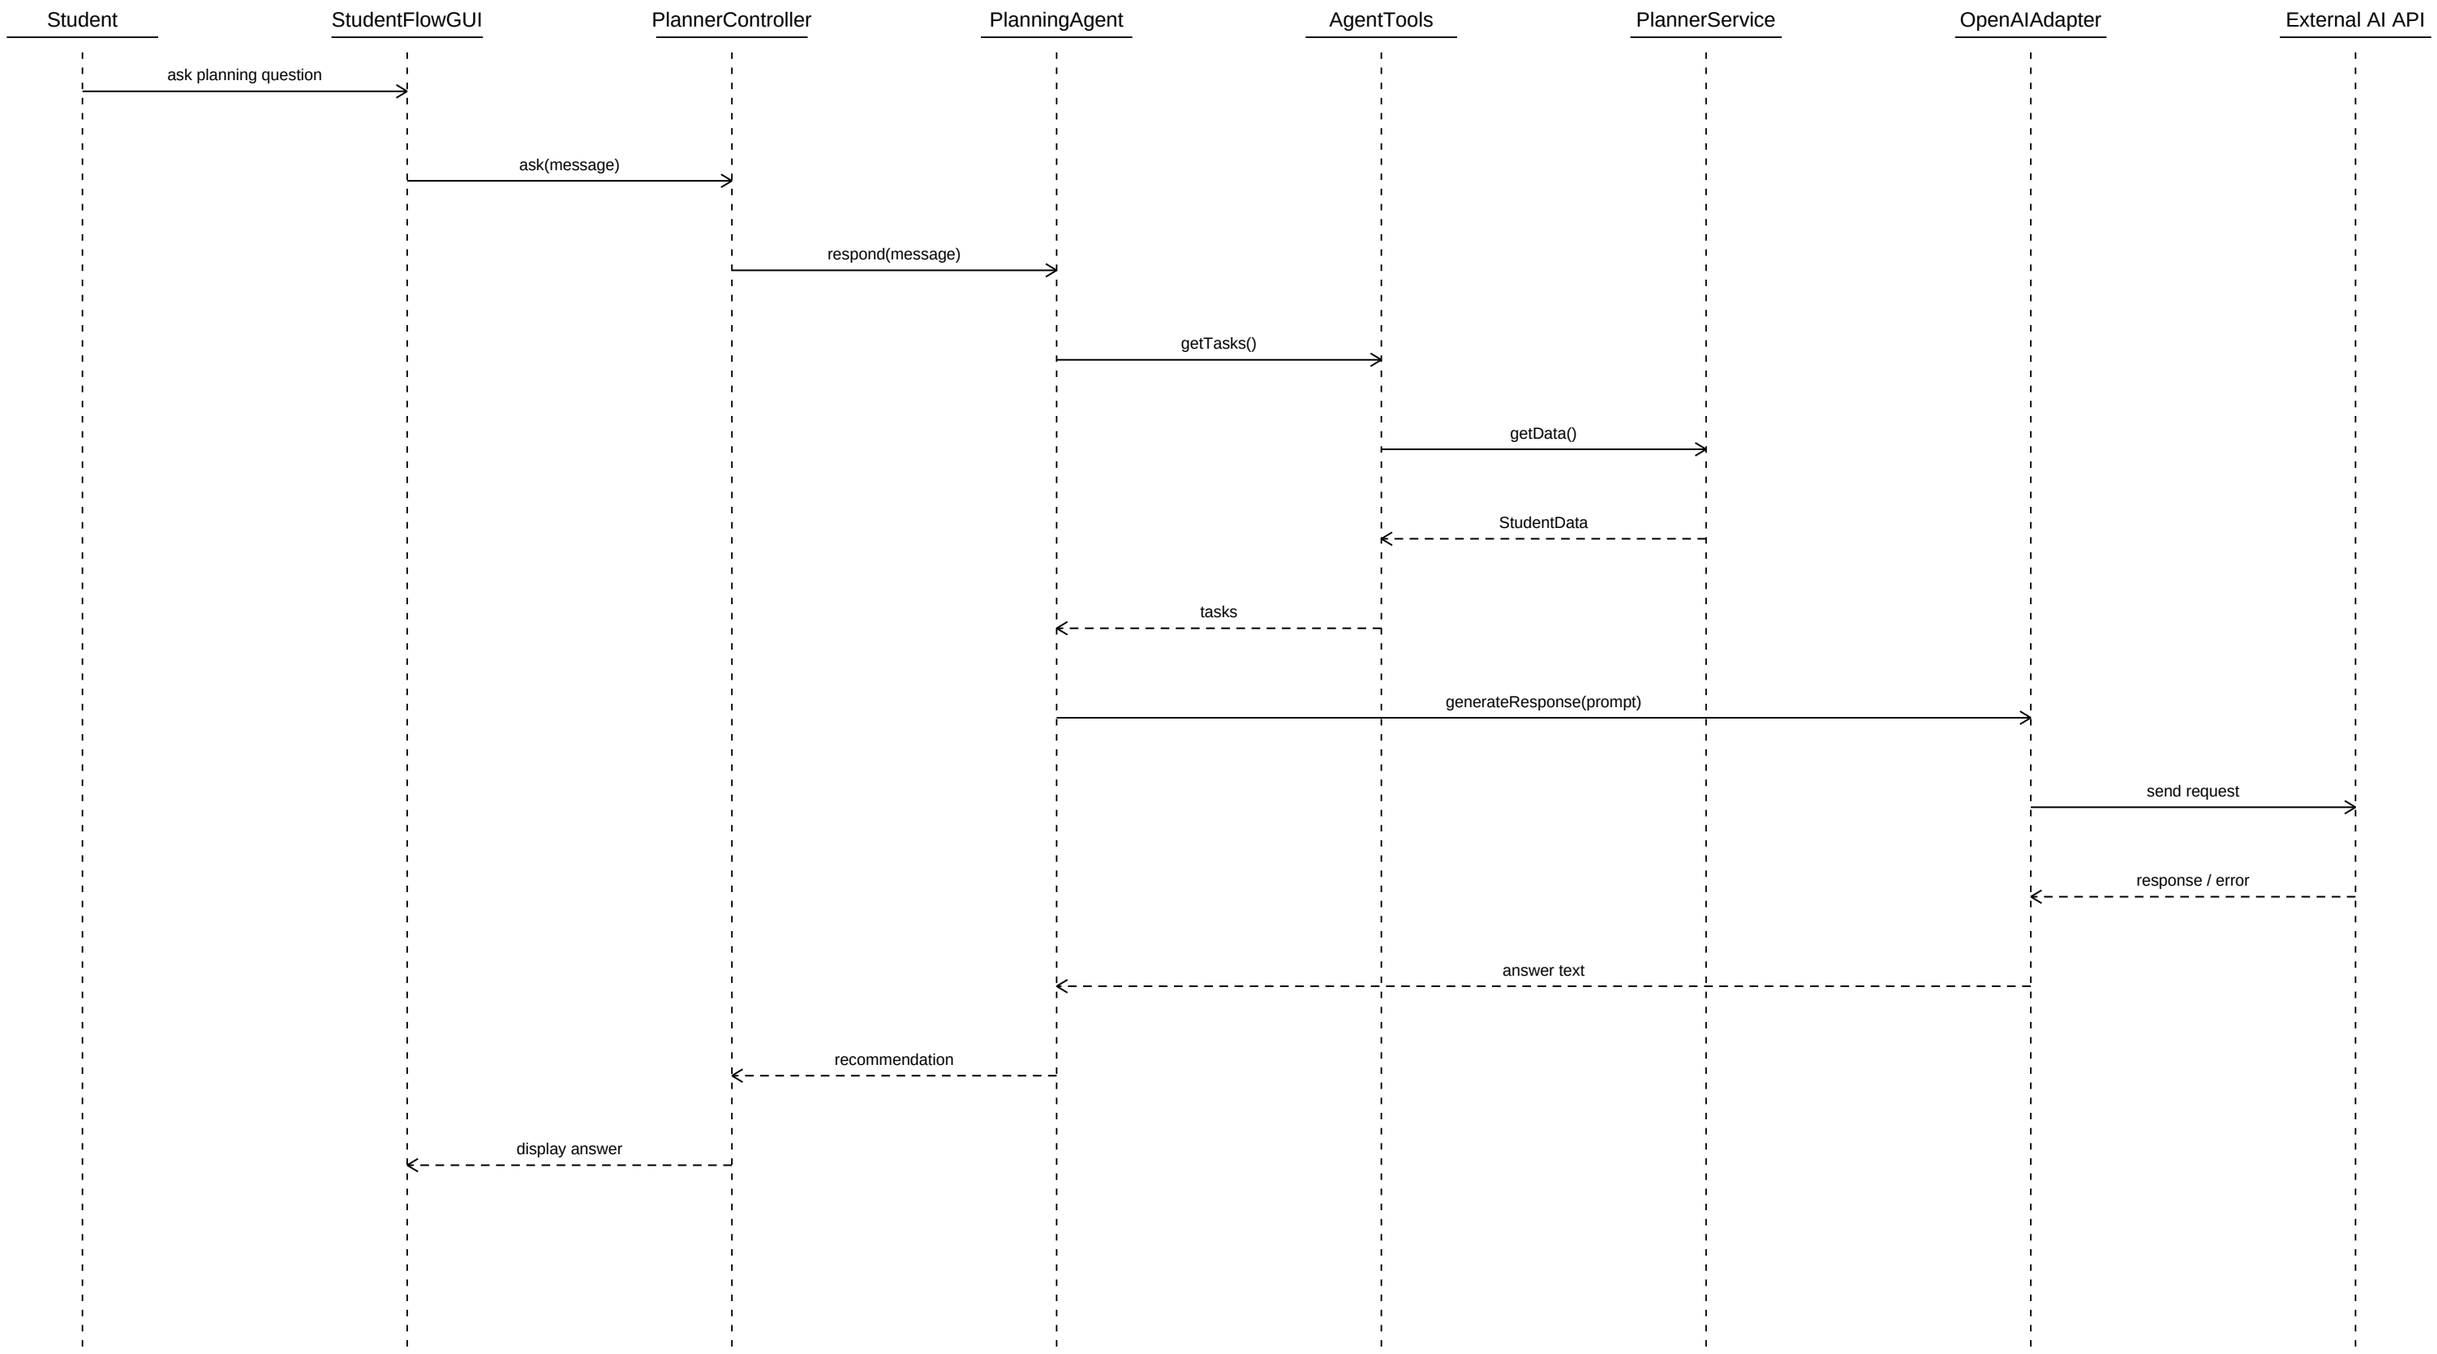
Note: Keep completed sessions unchanged. If no valid revision is possible, retain the approved plan.

5. Track habits and progress (UC09)



Note: If the habit does not exist or the date was already recorded, show a message and do not save.

6. Ask the AI planner assistant (UC10)



Note: The agent reads planner data but does not save changes. If the AI service fails, display an error.
